MOVE-IN AND MOVE-OUT PROCEDURES FOR 68-12, 68-20, 68-30, 68-36 AND 68-44 BURNS STREET

In order to facilitate a successful move-in/out, the following procedures are to be followed when moving furniture, furnishings, and/or personal property into or out of the buildings:

MOVE-IN / MOVE-OUT FEES AND DEPOSITS

The payment of the following fees is due at the time of closing (for unit purchases and sales) or at any time you submit the sublet application (for sublets). These fees apply to both moves IN and OUT of the buildings, and are payable by both the shareholder/seller who is moving out, and the prospective purchaser/sub lessee who is moving in.

- A. By certified check, bank check, or money order, the amount of FIVE HUNDRED DOLLARS (\$500), payable to Burns Street Owners Corp., as a **non-refundable move-in or move-out fee**.
- B. By certified check, bank check, or money order, the amount of FIVE HUNDRED DOLLARS (\$500), payable to Burns Street Owners Corp., as a **security deposit for a move-in or move-out, which shall be refunded after final inspection by the Superintendent / Managing Agent and assurance that no damage has occurred during the move**.

All checks must be made payable to Burns Street Owners Corp.

Please note that Shareholders who move out prior to a closing or a submission of a sublet application package must also submit to Excel Bradshaw Management Group the move-out fees and deposits required prior to scheduling a move-out date with the Superintendent. No refund checks will be issued unless you inform Excel Bradshaw of your forwarding address. The Superintendent will not schedule a moving date unless approval is received from the Managing Agent.

MOVE-IN/OUT SCHEDULING

Move in and out of the buildings **must occur between 9:00 a.m. and 5:00 p.m., Monday through Friday, excluding holidays**. It is very important that you schedule a moving date with the Superintendent at least one week before the move. This will allow the Superintendent to take the proper precautions, including the hanging of elevator padding, to prevent possible damage to common areas of the building. Please take this into consideration when you make arrangements with moving companies. There will be no exceptions to this policy.

An inspection of the common areas of the premises, including elevators will be made within a reasonable time after you move. If any damage has occurred, the managing agent will notify you in writing. The cost of repairs will be deducted from your deposit amount and the balance, if any, will be refunded to you. If there is any damage that exceeds the amount of your deposit, you will be required to pay the additional amount within ten (10) days of receipt of notification by the Managing Agent. If there is no damage, the deposit will be refunded in full. Please note that the refund process will take 30-45 days, since confirmation of no damage must be received and refund checks drawn. Also, please be reminded that you must inform us of your new address if you are moving out of the building.

INSURANCE REQUIREMENTS

Please note that all moving companies who are hired to move you **in or out** of the buildings will be required to provide the Cooperative with the required Certificates of Insurance. This certificate will name Burns Street Owners Corp. and Excel Bradshaw Management Group, LLC as additionally insured on their policy. The Certificate of Insurance requirements can be found within this package.

Please sign below indicating that you have read and agree to abide by all of the above procedures.

Delivery Procedure

Please note that all residents of the Burns Street Owners Corp. buildings (68-12, 68-20, 68-30, 68-36 and 68-44) must follow the following procedure when having any furniture or bulky appliances delivered to their units:

1. Superintendent must be informed at least 48 hours prior to delivery. This will allow the Super to hang the appropriate padding in the elevators to prevent damage to the elevators.
2. All items must be unpacked either outside the building or in the individual's apartment – not in the basement or other common areas of the building.
3. All boxes and packing materials must be removed by the delivery person. If it is left behind, the resident is responsible for breaking down and folding all packing, and the proper disposing and recycling of all materials.
4. **Any damage to the elevators, the lobby, or any other common areas of the building will be the sole responsibility of the resident.** Please note that the Management company will assess any damage and bill the Shareholder immediately if any damage is found.

Your cooperation and adherence to these policies will keep the elevators and common areas looking good for many years to come.

Thank you,

Your Board of Directors

 - f. No public hall above the ground floor of the Building can be decorated or furnished by any shareholder/tenant in any manner without the prior consent of all the shareholder/tenants to whose apartments such hall serves as a means of ingress and egress; in the event of disagreement among such shareholder/tenants, the Board of Directors will decide.
 - g. No radio or television aerial is to be attached to or hung from the exterior of the building without the prior written approval of the Co-op or its managing agent.
 - h. No sign, notice, advertisement or illumination may be inscribed or exposed on or at any window or other part of the Building, except those approved in writing by the co-op or its managing agent.
 - i. The shareholder/tenant shall keep the windows of the apartment clean. In case of refusal or neglect of the shareholder/tenant during 10 days after notice in writing from the Co-op or its managing agent to clean the windows, such cleaning may be done by

the Co-op, which will have the right, by its officers or authorized agents, to enter the Apartment for the purpose and to charge the cost of such cleaning to the shareholder.

- j. No vehicle belonging to a shareholder/tenant or member of the family or guest, or subtenant, or employee of a shareholder/tenant may be parked in such manner as to impede or prevent ready access to any entrance of the building by another vehicle.

3. NOISE ABATEMENT:

- a. No shareholder/tenant may make or permit any disturbing noises in the building, or do or permit anything to be done therein which will interfere with the rights, comfort or convenience of other shareholder/tenants.
- b. No shareholder/tenant may play any musical instrument or operate/play any media (e.g. radio, television, CD player, etc.) audible in other apartments between the hours of eleven o'clock p.m. (11:00 PM) and the following eight o'clock a.m. (8:00 AM) if this disturbs or annoys other occupants of the Building.

4. WASTE DISPOSAL:

- a. All wet debris is to be securely wrapped or bagged in small package size and placed in the designated area of the basement.
- b. Debris should be completely drip-free before it leaves the apartment and carried to basement in a careful manner and in a drip-proof container

- d. Large crates, furniture, appliances, or other large solid matter are the responsibility of the shareholder and should be placed curbside on the appropriate day, i.e. the evening before or the day of trash pickup by the Dept. of Sanitation.
- e. Toilets are not to be used for any purposes other than those for which they were constructed, nor any sweepings, rubbish, rags or any other article be thrown into them. The cost of repairing any damage resulting from misuse will be paid for by the shareholder/tenant in whose apartment the problem originated.

5. PETS, OR OTHER BIRDS AND ANIMALS:

6. SUBLETS:

- a. Sublets must be approved by the Board of Directors. Co-ops decrease in their standing as an investment with banks the higher is the percentage of apartments that are not lived in by their owners. There is an annual sublet fee of \$6 per share.
 - b. Shareholders must have lived within the co-op, maintaining it as their primary residence, for at least one year (from move-in date) before requesting consideration for permission to sublet.
 - c. Shareholders who sublet illegally, i.e. without Board and management approval, will be fined an additional \$6 per share (above the sublet fee) and given 30 days to terminate the lease. If the illegal tenants have not moved out within 30 days, the shareholder will be charged 2% interest per month on fines.
7. The co-op has the right from time to time to curtail or relocate any space devoted to storage or laundry purposes.
8. Complaints regarding maintenance of the building should be made to the Super in writing. 13. Any consent or approval given under these House Rules by the co-op is revocable at any time.
14. These House Rules may be added to, amended or repealed at any time by resolution of the Board of Directors of the co-op.

Simple Steps To Protect Your Family From Lead Hazards

If you think your home has high levels of lead:

- ◆ Get your young children tested for lead, even if they seem healthy.
- ◆ Wash children's hands, bottles, pacifiers, and toys often.
- ◆ Make sure children eat healthy, low-fat foods.
- ◆ Get your home checked for lead hazards.
- ◆ Regularly clean floors, window sills, and other surfaces.
- ◆ Wipe soil off shoes before entering house.
- ◆ Talk to your landlord about fixing surfaces with peeling or chipping paint.
- ◆ Take precautions to avoid exposure to lead dust when remodeling or renovating (call 1-800-424-LEAD for guidelines).
- ◆ Don't use a belt-sander, propane torch, high temperature heat gun, scraper, or sandpaper on painted surfaces that may contain lead.
- ◆ Don't try to remove lead-based paint yourself.

Are You Planning To Buy, Rent, or Renovate a Home Built Before 1978?

Many houses and apartments built before 1978 have paint that contains high levels of lead (called lead-based paint). Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly.

OWNERS, BUYERS, and RENTERS are encouraged to check for lead (see page 6) before renting, buying or renovating pre-1978 housing.

Federal law requires that individuals receive certain information before renting, buying, or renovating pre-1978 housing:

LANDLORDS have to disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a disclosure about lead-based paint.

SELLERS have to disclose known information on lead-based paint and lead-based paint hazards before selling a house. Sales contracts must include a disclosure about lead-based paint. Buyers have up to 10 days to check for lead.

RENOVATORS disturbing more than 2 square feet of painted surfaces have to give you this pamphlet before starting work.

IMPORTANT!

Lead From Paint, Dust, and Soil Can Be Dangerous If Not Managed Properly

- FACT:** Lead exposure can harm young children and babies even before they are born.
- FACT:** Even children who seem healthy can have high levels of lead in their bodies.
- FACT:** People can get lead in their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.
- FACT:** People have many options for reducing lead hazards. In most cases, lead-based paint that is in good condition is not a hazard.
- FACT:** Removing lead-based paint improperly can increase the danger to your family.

If you think your home might have lead hazards, read this pamphlet to learn some simple steps to protect your family.

Lead Gets in the Body in Many Ways

Childhood lead poisoning remains a major environmental health problem in the U.S.

Even children who appear healthy can have dangerous levels of lead in their bodies.

People can get lead in their body if they:

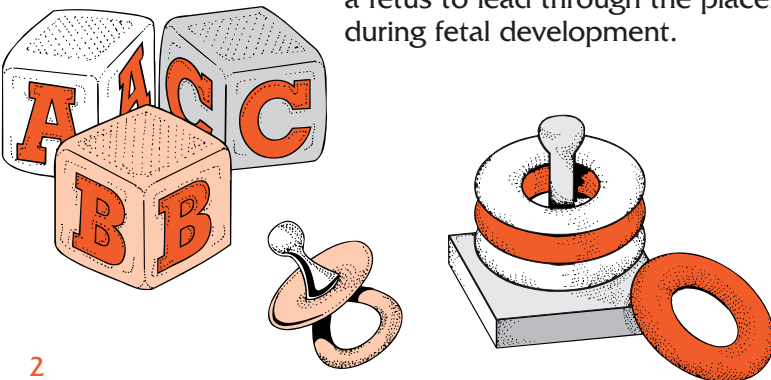

- ◆ Breathe in lead dust (especially during renovations that disturb painted surfaces).
- ◆ Put their hands or other objects covered with lead dust in their mouths.
- ◆ Eat paint chips or soil that contains lead.

Lead is even more dangerous to children under the age of 6:

- ◆ At this age children's brains and nervous systems are more sensitive to the damaging effects of lead.
- ◆ Children's growing bodies absorb more lead.
- ◆ Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Lead is also dangerous to women of childbearing age:

- ◆ Women with a high lead level in their system prior to pregnancy would expose a fetus to lead through the placenta during fetal development.

Lead's Effects

It is important to know that even exposure to low levels of lead can severely harm children.

In children, lead can cause:

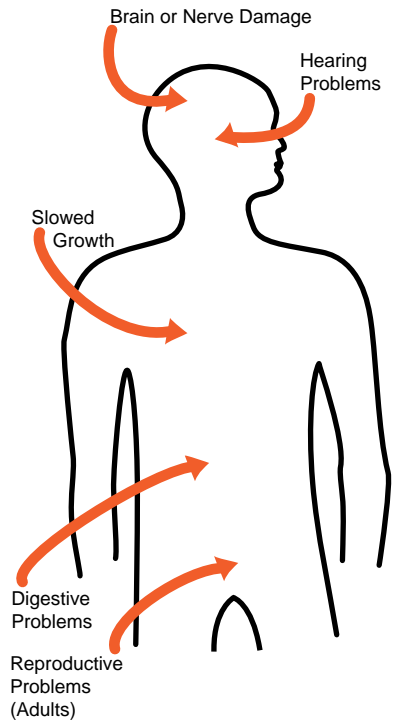

- ◆ Nervous system and kidney damage.
- ◆ Learning disabilities, attention deficit disorder, and decreased intelligence.
- ◆ Speech, language, and behavior problems.
- ◆ Poor muscle coordination.
- ◆ Decreased muscle and bone growth.
- ◆ Hearing damage.

While low-lead exposure is most common, exposure to high levels of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

Although children are especially susceptible to lead exposure, lead can be dangerous for adults too.

In adults, lead can cause:

- ◆ Increased chance of illness during pregnancy.
- ◆ Harm to a fetus, including brain damage or death.
- ◆ Fertility problems (in men and women).
- ◆ High blood pressure.
- ◆ Digestive problems.
- ◆ Nerve disorders.
- ◆ Memory and concentration problems.
- ◆ Muscle and joint pain.

Where Lead-Based Paint Is Found

In general, the older your home, the more likely it has lead-based paint.

Many homes built before 1978 have lead-based paint. The federal government banned lead-based paint from housing in 1978. Some states stopped its use even earlier. Lead can be found:

- ◆ In homes in the city, country, or suburbs.
- ◆ In apartments, single-family homes, and both private and public housing.
- ◆ Inside and outside of the house.
- ◆ In soil around a home. (Soil can pick up lead from exterior paint or other sources such as past use of leaded gas in cars.)

Checking Your Family for Lead

Get your children and home tested if you think your home has high levels of lead.

To reduce your child's exposure to lead, get your child checked, have your home tested (especially if your home has paint in poor condition and was built before 1978), and fix any hazards you may have. Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect high levels of lead. Blood tests are usually recommended for:

- ◆ Children at ages 1 and 2.
- ◆ Children or other family members who have been exposed to high levels of lead.
- ◆ Children who should be tested under your state or local health screening plan.

Your doctor can explain what the test results mean and if more testing will be needed.

Identifying Lead Hazards

Lead-based paint is usually not a hazard if it is in good condition, and it is not on an impact or friction surface, like a window. It is defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter, or more than 0.5% by weight.

Deteriorating lead-based paint (peeling, chipping, chalking, cracking or damaged) is a hazard and needs immediate attention. It may also be a hazard when found on surfaces that children can chew or that get a lot of wear-and-tear, such as:

- ◆ Windows and window sills.
- ◆ Doors and door frames.
- ◆ Stairs, railings, banisters, and porches.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Dust also forms when painted surfaces bump or rub together. Lead chips and dust can get on surfaces and objects that people touch. Settled lead dust can re-enter the air when people vacuum, sweep, or walk through it. The following two federal standards have been set for lead hazards in dust:

- ◆ 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) and higher for floors, including carpeted floors.
- ◆ 250 $\mu\text{g}/\text{ft}^2$ and higher for interior window sills.

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. The following two federal standards have been set for lead hazards in residential soil:

- ◆ 400 parts per million (ppm) and higher in play areas of bare soil.
- ◆ 1,200 ppm (average) and higher in bare soil in the remainder of the yard.

The only way to find out if paint, dust and soil lead hazards exist is to test for them. The next page describes the most common methods used.

Lead from paint chips, which you can see, and lead dust, which you can't always see, can both be serious hazards.

Checking Your Home for Lead

Just knowing that a home has lead-based paint may not tell you if there is a hazard.

You can get your home tested for lead in several different ways:

- ◆ A paint **inspection** tells you whether your home has lead-based paint and where it is located. It won't tell you whether or not your home currently has lead hazards.
- ◆ A **risk assessment** tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards.
- ◆ A combination risk assessment and inspection tells you if your home has any lead hazards and if your home has any lead-based paint, and where the lead-based paint is located.

Hire a trained and certified testing professional who will use a range of reliable methods when testing your home.

- ◆ Visual inspection of paint condition and location.
- ◆ A portable x-ray fluorescence (XRF) machine.
- ◆ Lab tests of paint, dust, and soil samples.

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency (see bottom of page 11) for more information, or call **1-800-424-LEAD (5323)** for a list of contacts in your area.

Home test kits for lead are available, but may not always be accurate. Consumers should not rely on these kits before doing renovations or to assure safety.

What You Can Do Now To Protect Your Family

If you suspect that your house has lead hazards, you can take some immediate steps to reduce your family's risk:

- ◆ If you rent, notify your landlord of peeling or chipping paint.
- ◆ Clean up paint chips immediately.
- ◆ Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner or a cleaner made specifically for lead. REMEMBER: NEVER MIX AMMONIA AND BLEACH PRODUCTS TOGETHER SINCE THEY CAN FORM A DANGEROUS GAS.
- ◆ Thoroughly rinse sponges and mop heads after cleaning dirty or dusty areas.
- ◆ Wash children's hands often, especially before they eat and before nap time and bed time.
- ◆ Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- ◆ Keep children from chewing window sills or other painted surfaces.
- ◆ Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- ◆ Make sure children eat nutritious, low-fat meals high in iron and calcium, such as spinach and dairy products. Children with good diets absorb less lead.

Reducing Lead Hazards In The Home

Removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

Always use a professional who is trained to remove lead hazards safely.

In addition to day-to-day cleaning and good nutrition:

- ◆ You can **temporarily** reduce lead hazards by taking actions such as repairing damaged painted surfaces and planting grass to cover soil with high lead levels. These actions (called “interim controls”) are not permanent solutions and will need ongoing attention.
- ◆ To **permanently** remove lead hazards, you should hire a certified lead “abatement” contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent removal.

Always hire a person with special training for correcting lead problems—someone who knows how to do this work safely and has the proper equipment to clean up thoroughly. Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Once the work is completed, dust cleanup activities must be repeated until testing indicates that lead dust levels are below the following:

- ◆ 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors, including carpeted floors;
- ◆ 250 $\mu\text{g}/\text{ft}^2$ for interior windows sills; and
- ◆ 400 $\mu\text{g}/\text{ft}^2$ for window troughs.

Call your state or local agency (see bottom of page 11) for help in locating certified professionals in your area and to see if financial assistance is available.

Remodeling or Renovating a Home With Lead-Based Paint

Take precautions before your contractor or you begin remodeling or renovating anything that disturbs painted surfaces (such as scraping off paint or tearing out walls):

- ◆ **Have the area tested for lead-based paint.**
- ◆ **Do not use a belt-sander, propane torch, high temperature heat gun, dry scraper, or dry sandpaper** to remove lead-based paint. These actions create large amounts of lead dust and fumes. Lead dust can remain in your home long after the work is done.
- ◆ **Temporarily move your family** (especially children and pregnant women) out of the apartment or house until the work is done and the area is properly cleaned. If you can't move your family, at least completely seal off the work area.
- ◆ **Follow other safety measures to reduce lead hazards.** You can find out about other safety measures by calling 1-800-424-LEAD. Ask for the brochure "Reducing Lead Hazards When Remodeling Your Home." This brochure explains what to do before, during, and after renovations.

If you have already completed renovations or remodeling that could have released lead-based paint or dust, get your young children tested and follow the steps outlined on page 7 of this brochure.

If not conducted properly, certain types of renovations can release lead from paint and dust into the air.

Other Sources of Lead

While paint, dust, and soil are the most common sources of lead, other lead sources also exist.

- ◆ **Drinking water.** Your home might have plumbing with lead or lead solder. Call your local health department or water supplier to find out about testing your water. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might have lead in it:
 - Use only cold water for drinking and cooking.
 - Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.
- ◆ **The job.** If you work with lead, you could bring it home on your hands or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- ◆ Old painted **toys** and **furniture**.
- ◆ Food and liquids stored in **lead crystal** or **lead-glazed pottery or porcelain**.
- ◆ **Lead smelters** or other industries that release lead into the air.
- ◆ **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture.
- ◆ **Folk remedies** that contain lead, such as “greta” and “azarcon” used to treat an upset stomach.
